

IS YOUR HEALTH INSURER STEERING YOU AWAY FROM YOUR PREFERRED PHARMACY?

As your local pharmacy, it is our privilege to provide you with pharmacy services and products. However, your insurer or your PBM may be claiming you can reduce your costs by switching to mail order or some big box pharmacy or may be telling you that your local preferred pharmacy is no longer in-network.

If you feel pressured by your health insurer or PBM to take your business elsewhere, there are some free resources to help you fight back against this unfair steering and empower you to:

- Contact your employer and let them know that your health insurer or PBM is interfering with access to your pharmacy of choice.
- Urge your legislators, both federal and state, to allow patients to use the pharmacy of their choice.
- Communicate your experience to the community and raise awareness of health insurers or PBMs interfering with your healthcare.

Visit www.fight4rx.org for a toolkit of resources available to you to help you fight back against the insurance companies.

If you would like to speak with someone about your experience call (703) 838-2677

Protect your access to safe and affordable medicine.
