Support for Legislative Bill 812: Pharmacy Technician Vaccine Administration

Chairman Arch and Members of the Health & Human Services Committee,

We thank you for the opportunity to submit testimony on **Legislative Bill 812**, a bill that permits pharmacy technicians to administer vaccines under the supervision of the pharmacist. We **support** this bill as it ensures pharmacy technicians will be able to continue administering vaccines after their temporary federal authority to administer expires.

With over 2,500 pharmacists practicing within Nebraska, passage of this bill will allow pharmacists, pharmacy personnel, and pharmacies to meet the demand for health care services and continue to be a gateway for patients to access quality care. Nebraska pharmacy technicians have been administering vaccines under the supervision of pharmacists since October 2020, when the U.S. Department of Health and Human Services (HHS) issued guidance related to the HHS Declaration Under the Public Readiness and Emergency Preparedness (PREP) Act for Medical Countermeasures Against COVID-19. This federal guidance authorized qualified pharmacy technicians, acting under the supervision of a qualified pharmacist, to administer Food and Drug Administration (FDA)-authorized or FDA-licensed COVID-19 vaccines to persons ages three or older and to administer FDA-authorized or FDA-licensed ACIP-recommended vaccines to persons ages three through 18 according to Advisory Committee on Immunization Practice's (ACIP's) standard immunization schedule.¹ In August 2021, this temporary federal authority was expanded to authorize qualified pharmacy technicians to administer seasonal influenza vaccines, under the supervision of a qualified pharmacist, to persons ages 19 and older consistent with ACIP recommendations.² As beneficial as this temporary federal authority has been in expanding access to care and relieving some of the burden on an overstressed healthcare system, it is set to expire in 2024. Approval of this bill makes this temporary federal authority permanent under state scope of practice, and it expands the authority to cover adult immunizations beyond influenza and COVID-19 as well.

Over 90% of Americans live within five miles of a community pharmacy,³ and more than any other segment of the pharmacy industry, independent community pharmacies are often located in underserved rural and urban areas. These pharmacies are frequently the most accessible healthcare providers in many Nebraska communities and are vital in the provision of immunizations, testing, and

other services. This bill will not only allow pharmacies to expand their vaccination capacity but could also be an opportunity for patients without a medical home or primary care provider to be plugged in to the healthcare system and to access other services they might not otherwise receive.

NCPA, NASPA and APhA strongly support the Nebraska Pharmacists Association (NPA) in their advocacy for this bill. We appreciate the bill's sponsor, Senator Hilkemann, for his attention to this important issue and urge approval from this committee.

Sincerely,

American Pharmacists Association
