

Nov. 2022 Report on Drug Shortages

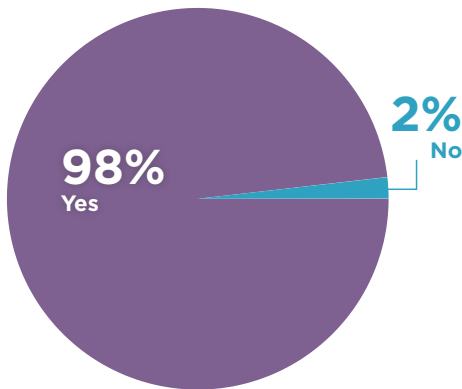

Executive Summary:

NCPA surveyed roughly 8,000 pharmacy owners and managers between October 19, 2022, and October 31, 2022. The survey produced 333 responses. Questions focused on drug shortages, specifically Adderall and amoxicillin.

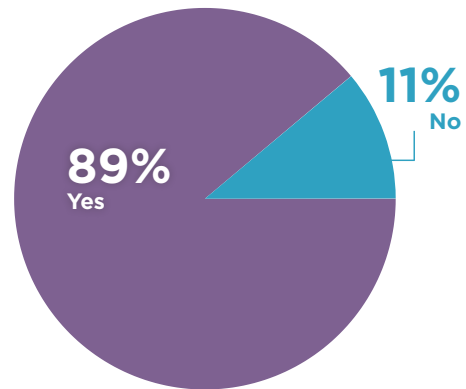

Key findings:

- 98 percent of community pharmacists said they were currently experiencing a shortage of drugs
- 89 percent of community pharmacists said they are currently experiencing a shortage of Adderall.
- 66 percent of community pharmacists said they are currently experiencing a shortage of amoxicillin.

1. Is your pharmacy currently experiencing a drug shortage?

2. Are you experiencing shortages of Adderall (or generics) on backorder?

3. Are you experiencing shortages of amoxicillin?
