

July 12, 2023

Dear Members of the United States Senate and House of Representatives:

We, the undersigned, are businesses and employers of all sizes and advocates for patients. Collectively, we represent many diverse sectors of our country's economy and millions of Americans who rely on prescription medications to improve their health. We all agree the cost of prescription drugs is rising dramatically, and these costs are unsustainable for both businesses and patients. We wish to express our gratitude for the many bipartisan legislative efforts aimed at reducing these costs by reforming the operations of pharmacy benefit managers (PBMs) and bringing greater transparency to their opaque business practices.

We are encouraged by the momentum and applaud both chambers of Congress for working to address the critical issues surrounding PBMs and their impact on the health care system. However, there is still much work to be done. We urge you to seize this opportunity and pass legislation that will significantly reform the PBM industry to achieve a health care system that prioritizes patient well-being, promotes competition, ensures fair pricing and access to essential medications, and ultimately reduces costs to plan sponsors. As Congress continues its work, it must also ensure that federal legislative measures do not preempt state efforts to regulate the relationships between PBMs and pharmacies, a relationship that the Supreme Court unanimously ruled is not subject to ERISA.

Individual states have recognized that the largest PBMs that are vertically integrated with health insurance companies, acquired pharmacies (retail, specialty and mail-order) and rebate aggregators, driving up costs for prescription medications, delaying access to necessary treatments, shuttering pharmacies and giving higher-priced drugs more favorable health-plan coverage. Many states have taken action to address the lack of transparency that has created an environment in which PBMs are free to engage in anticompetitive and deceptive behavior that harms patients, some of whom are our employees, while also passing on hidden costs to us that inhibit our ability to innovate and grow. It is important to note that in these states that have implemented PBM reform, there is no evidence that health insurance costs have increased.

By passing PBM reform measures that also preserve the rights of states to impose stricter regulations, Congress has the power to lower prescription drug costs and alleviate the financial burden on patients and the health care system at large, while enhancing access to affordable medications for our employees and promoting a healthier, more competitive business environment. We stand ready to continue supporting you in these efforts and eagerly await the positive impact that PBM reform can have on the lives of all Americans.

Thank you for your attention to this urgent matter.
