

Long-Term Care Pharmacy at Home Workshop

Loews Kansas City
1515 Wyandotte Street, Kansas City, MO, 64108

Overview:

Discover the future of pharmacy care in this dynamic workshop on Long-Term Care Pharmacy at Home. Designed for forward-thinking pharmacists, this session explores how care traditionally delivered in LTC facilities is shifting into the home—creating new opportunities to expand clinical impact and meet growing patient demand.

Participants will gain practical insights into building and scaling an LTC Pharmacy at Home model, from navigating regulatory requirements and staffing structures to selecting optimal medication packaging solutions. The workshop also highlights high-value clinical services—such as transitions of care, remote therapy monitoring/remote patient monitoring, and chronic disease support—that improve patient outcomes while reducing healthcare utilization.

Whether you're looking to launch or enhance home-based LTC services, this workshop will equip you with actionable strategies, including marketing approaches to reach target populations and referral partners, positioning your pharmacy at the forefront of this evolving care model.
